

UMB_Cloud Services: Digital Business Simplified.

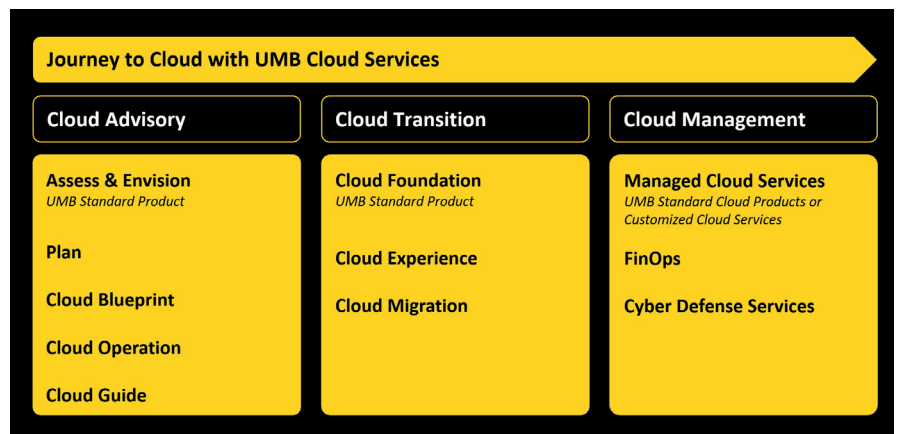

Advancing digitalization is forcing companies and organizations to constantly adapt to rapid changes in economy and society. We are in the age of digital business.

Future-proof cloud services are the foundation for digital business. By using suitable cloud services, the necessary solutions can be developed to remain competitive and drive business growth. In order to use cloud services profitably, a well thought-out and successfully implemented cloud transformation is required.

Cloud journey with UMB cloud services

We will assist you on your cloud transformation journey with expert advice, strong project implementation experience, and high-quality cloud services products. This includes cloud advisory, cloud transition, and cloud management:

Cloud Advisory

Our cloud consulting services take a holistic approach to ensure a successful cloud transformation. Organization, processes and technology play a central role. A clear understanding of your initial situation and the development of a suitable vision form the basis for the development of the journey to the cloud, which ultimately leads to your business benefits.

Along the journey to the cloud, the future cloud operation in your company is of crucial importance. The focus here is on data storage, data sovereignty, availability, resilience and cyber defense. Our consulting services and solutions follow these principles to ensure that your cloud strategy is implemented optimally.

Cloud Transition

The first step into the cloud requires a well-structured and organized foundation. To create this, we offer centralized cloud governance and management of multiple cloud accounts with the UMB Cloud Foundation. This allows us to optimally map the customer's organization with the following integrations:

- Identity & access management for centralized access management.
- Centralized management of shared services within the organization.
- Automated cloud account provisioning and management per account.
- Automated provisioning of cloud resources.

Cloud Management

UMB managed cloud services are characterized by maximum reliability, flexibility and cost transparency. Here are some key features:

- We deliver standardized cloud services products based on established cloud providers: Azure, AWS, Google. We follow the principles of automation and security by design.
- We will tailor the appropriate use of modularized and standardized cloud services products to meet your business needs.
- You will receive seamless and consistent cloud services regardless of whether you use one or more cloud providers.
- We continuously evaluate the latest trends and seamlessly integrate them into our cloud services.

Your advantages

- State-of-the-art solutions and technologies designed to benefit your business.
- Comprehensive professional competence and expertise from certified cloud experts for your journey to the cloud.
- Proven approaches and service models backed by numerous customer projects and empirical data.

A man with a beard and tattoos on his arms is wearing sunglasses and adjusting them with both hands. He is wearing a black t-shirt with a yellow horizontal stripe.

«There is no such thing as a bad cloud. There is only bad consulting.»
